The indicators below, drawn from the SALT Survey, provide a sense of the extent to which students in this school have begun to experiment with behavior that risks or compromises their physical or mental health. If persistent or habitual, such behaviors can interfere with or even damage a student’s education, health, or both. (Only students in 4th grade and above take the SALT survey.)

### Student risk behaviors and attitudes

**This school**

- They did not eat any vegetables or fruits in the past day.
  - 0%
- They used chewing tobacco or snuff.
  - 0%
