The New England Common Assessment Program (NECAP) tests are administered annually in October to students in grades 3 through 8. RIDE uses the results of these tests to determine school-performance classifications and to measure school and district progress. Please note that this is the only report in Information Works! 2007 that uses data from the 2006-07 school year.

**Assessment Results**

The assessment results for the years 2005-06 and 2006-07 are shown in the bar graphs. The results include data for both math and reading. The graphs display the percentage of students reaching proficiency and not reaching proficiency. The proficiency levels are categorized as Proficient with Distinction, Proficient, Partially Proficient, and Substantially Below Proficient.

**Performance Progress**

The performance progress for all tested grades is shown in the line graphs. The graphs show the percent proficient in mathematics and reading for the years 2005-06 and 2006-07. The data points for this school are compared to the data points for R.I. elementary schools.

**Proficiency by Student Characteristics**

No students in grade 5.
