Safe and Supportive Schools: Health Risks

Student risk behaviors and attitudes

The indicators below, drawn from the SALT Survey, provide a sense of the extent to which students in this school have begun to experiment with behavior that risks or compromises their physical or mental health. If persistent or habitual, such behaviors can interfere with or even damage a student’s education, health, or both. (Only students in 4th grade and above take the SALT Survey.)

Student health practices

Questions not asked at this grade level.

Students’ primary care

Where students say they usually see their regular doctor or nurse when they are sick:

Teacher and principal attitudes

Percent who agree or strongly agree that the following practices are essential to effective education:

- Too few responses to report
- Inadequate data submitted

R.I. 4th and 5th graders
