Safe and Supportive Schools: Health Risks

The indicators below, drawn from the annual SALT Survey, provide a sense of the extent to which students in this school have begun to experiment with behavior that risks or compromises their physical or mental health. If persistent or habitual, such behaviors can interfere with or even damage a student's education, health, or both.

### Student risk behaviors and attitudes

**They did not eat any vegetables or fruits in the past day.**

- This school: 0%
- R.I. middle schools: 20%

* Too few responses to report?
? Inadequate data submitted
