School goals

Deepening School/Community Involvement and Communication: Our Community Involvement sub-committee organized a Career Day for all students. The entire community collaborated to produce this positive activity.

Improving Instruction and Student Achievement: Each department focused upon analyzing existing curricula and standards and student achievement.

Shaping a Supportive School Climate: Several initiatives, including introducing a transitional course for Grade 9 (Skills for High School Success) & an alternative program (The Alternative Connection).

SETTING TARGETS: The SIT generated maximum targets for our School Improvement Plan. These 5% goals affirm our school’s commitment to enhanced student achievement.

Encouraging Professional Development: Our district initiated a Professional Development Academy as of January 1999. All our faculty completed 15 hours of professional development by June 99.
